GLOCALISM XOUP

A Video Capture Architecture API

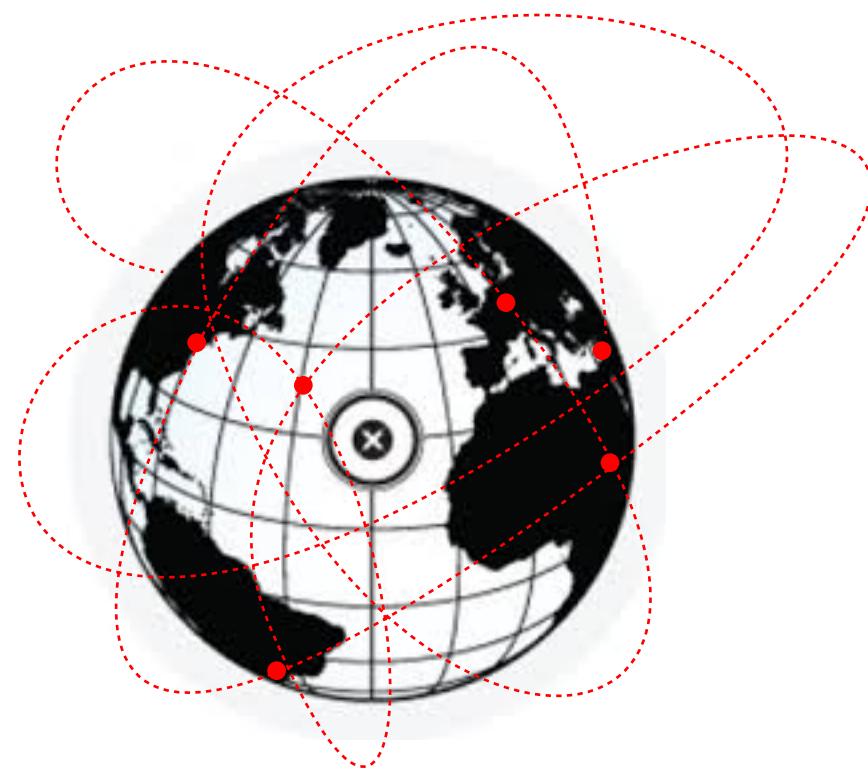

“Glocalism” = A Global / Local Network

“Xoup” = Diversity of approach and thought within Studio-X.
Soup is the antithesis to the melting pot.

STUDIO XOUP

! ?

An Architecture API ?

Perhaps it could be a technology used to influence the program of a space by triggering either an invitation, activation or the altering of behavior.

We could code ANYTHING

**and we did it until we discovered an
OKAY idea.**

Memecreator.org

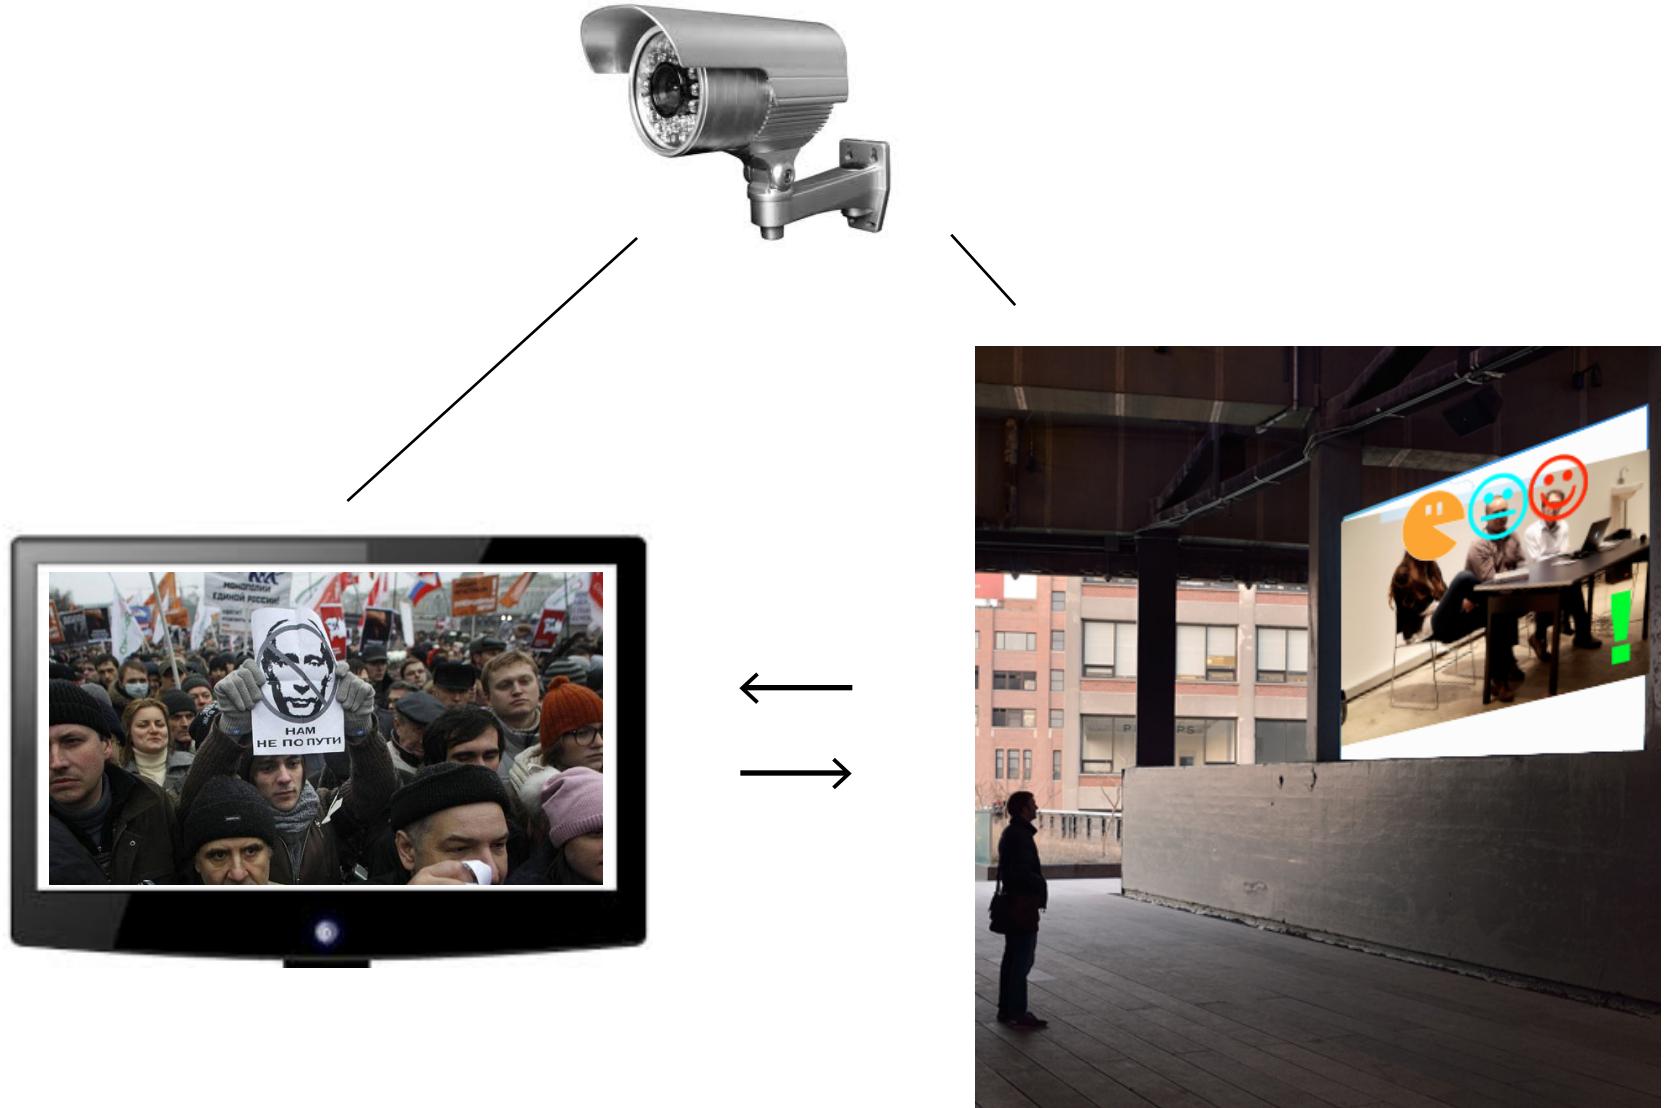

the naiveté of tech geeks and young programmers

Can we add to the definition of what it means to be “present” and use technology as a catalyst for this new type of participation?

Does the camera have to be limited to the idea of surveillance and a threat to privacy?

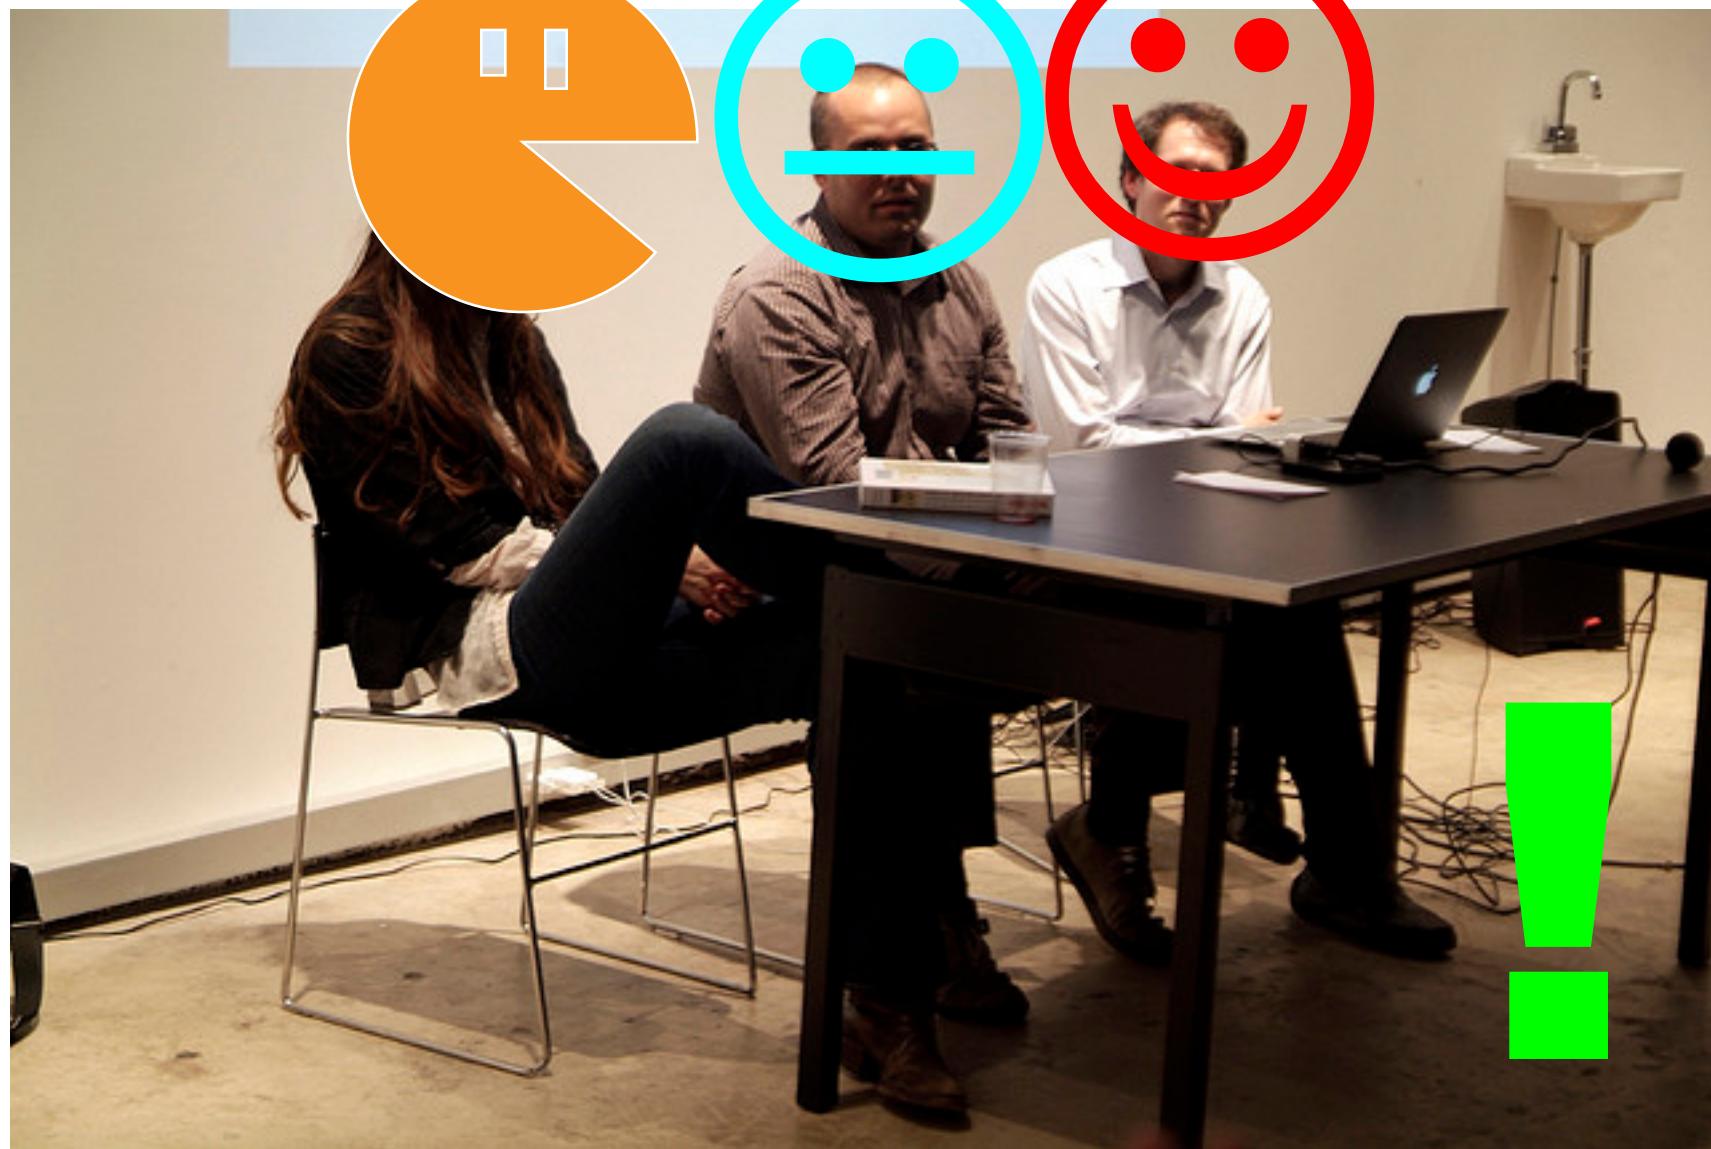

Is it meaningful to be remotely part of an event without knowing any identities?

How can Studio-X offices give more accountability to their respective cities without crossing a line of privacy and simultaneously broadcast its activities?
